

Independent Auto Repairers, Locksmiths, and Franchised Auto Dealers Agree

SAY NO TO H.R. 2048 AND FEDERALIZING AUTO REPAIR

True automotive service professionals don't want to trade a working private sector system that already provides access to service information, tools, and training for a bureaucratic system that involves:

More government

More regulation

More litigation

More vehicle thefts

More intellectual property at risk

More manufacturing jobs overseas

Don't be fooled – it's not about service information, it's about parts technology. Aftermarket auto parts distributors want to unfairly compete – they'll manufacture parts overseas with free access to automaker's parts technology.

OPPOSE H.R. 2048
